

Lipaoland and Lugang Excursion

LIHPAOLAND

It is the midst of summer in Taiwan. Hot, humid, thirsty, and sweat are the keywords for this. The 2014 IOI HOC organized this waterpark activity to let everybody forget these words temporary. Contestants along with their team guides are out of control, jumping in and out of pools, going up and down through water slides. On the other side, team leaders and guest head for Lugang, the economic and transport hub of central Taiwan in earlier times. The get to see this cultural site before heading for Lipaoland to dive into the water.

LUGANG

7/20 Weather Report

AM ☀ 29~35°C
PM ☁ 29~32°C

GA Meeting

The General Assembly (GA) Meeting is where the IC, ISC, HSC, and the team leaders get together to discuss, resolve issues, and relay information in the IOI contest. For example, before the contest, they will gather and vote on which and what tasks are appropriate for the contestant. Team leaders will use this opportunity to pursue the best interest for their team.

Volunteer Meetings

Every day before going to bed, the volunteers will have to attend a conference debriefing today's mission and briefing next day's mission. They will report problems encountered today and the 2014 IOI HOC will help resolve these issues. After all, they are the main window that the contestants can use to express their needs. In the following days, they must keep up the good work to make 2014 IOI a full success.

In addition, they are also the environment eco-friendly group. They will help clean up any mess we've made during the 2014 IOI.

Volunteers helps on cleanup and recycling.

Game

Assume that penguins live with a density of 1,000 penguins per square mile and can run at an average speed of 7 miles per hour on land and swim at 20 miles per hour. Also assume that a polar bear has a territory of 10 square miles, can run at 25 miles per hour and swim at 10 miles per hour, how many penguins will an average polar bear eat in any given month, remembering that a polar bear could, as a maximum, only eat one penguin per hour and 7% of the land is next to the sea.

Answer of 07/19:
Still 9 feet because the ladder will rise with the ship!
