

TASK TRANSLATION

BRIDGING THE LANGUAGE GAP

Team leaders are up on 7/14 midnight to work and prepare ahead for the contest tomorrow. Their primary task is to overcome language obstacle by translating the contest problem sets into the contestant's native language. To keep the leaders awake, the 2014 IOI has provided unlimited supply of coffee.

Leaders are under high pressure as this is no ordinary translation job. One little error in the translated problem can lead to catastrophic results: "Wrong answer!" for the contestant. Thus, for a successful competition result, we must salute to the team leaders for their work behind the curtains.

7/16 Weather Report

AM ☁ 28~36°C

PM ☁ 28~32°C

Lanyang Museum

The Lanyang Museum is located on the site of Wushi (meaning “black rock”) Port. During the Cing Dynasty, Wushi Port bristled with the masts of incoming and outgoing vessels. The harbor was not only an artery for the physical materials needed by the people of Yilan, it was also an important hub for cultural exchange with the outside world. The Lanyang Museum

was erected on the site to symbolize the fact that culture in Yilan is breaking new ground and reaching new heights and milestone.

The name Yilan actually finds its origins in the term “Kavalan”, the plains people who lived and worked here for thousands of years and provided the cultural foundation

for all the diverse ethnic groups that settled on the Lanyang Plains. As such, the human figure, traditionally found in Kavalan carvings, was employed as the symbol for the Lanyang Museum.

Administration, the heart of all activities. These tedious tasks including fund raising, coordination of activities and utilities, financing and accounting, accommodation, and much more are the burden of the 2014 IOI Administration Group. Since the group leader Dr. Lee, the chair of the 2014 IOI, is out for even bigger businesses, the burden is dumped onto the deputy leader of the group, Dr. Fang. She has been working these out for the contest to run smoothly. The place you live, the things you eat, the equipment you use, and the successful excursions are not possible without her coordination.

“We want all of the 2014 IOI guests to experience hospitality,” says Dr. Fang, “and we would like you to feel like home.” They have worked out plans to mobilize such a group of people around the contest site, accommodation, and excursions. They have also remove obstacles blocking the route to the contest such as visas and transportations. “After all, it is our pleasure and our duty,” which the Administration Group agreed on.

Please spend some time and look into your IOI backpack. “Each souvenir we design represents something of Taiwan,” says Dr. Fang. These little gifts are not only daily necessities, but also embedded with some culture of Taiwan.

The pillar of wishes

The 26th International Olympiad of Informatics opening ceremony took place at the Taipei International Convention Center (TICC), Taipei, Taiwan in July 14, 2014. Officials of the Taiwan government including the Vice President Mr. Den-Yih Wu, Commissioner Ms. Yi-Hua Lin of the Department of Education, Taipei City Government, the Political Deputy Minister Dr. Pi-Twan Huang from our primary host Ministry of Education, and the President of the National Taiwan Normal University Dr. Kuo-En Chang came to give encouragements to the contestants. With Deputy Minister Dr. Huang stating that "Computer science education is a key to a brighter future," it shows the importance of the IOI as it is

not only a competition, but an opportunity that allows participants to observe, exchange ideas with the elites of each country, and to enhance global perspective.

The first cultural dish served was the Dragon & Lion dance performed by the National Taiwan College of Performing Arts. This traditional dance is believed to bring good luck to all the participants. The second cultural dish served was the performance of diabolos, with fascinating tricks performed with extreme agility by the Cultural Arts Performing Taipei Group. The 2014 IOI organizing committee said "This is only the appetizer, we have more to show you in the following days."

Excursion

National Center for Traditional Art

Located beside Dongshan River in Yilan, National Center for Traditional Arts is designed with the goal of preserving Taiwan traditional arts while helping its renewal and innovation. The exterior of National Center for Traditional Arts is in red-tile with modern elements. All buildings and the streets display Taiwan life in earlier time.

National Center for Traditional Arts is a 24-hectare complex park that includes Definitely Taiwanese, Traditional Theater, Outdoor Theater, Modern Theater, Wen-Chang Temple, Exhibition Center, Traditional Handicraft Artists' Studio, Traditional Music Hall, Library, accommodation area, etc. It helps Taiwan public get close to traditional arts and has the opportunity to participate DIY. In addition to organized displays and performances of culture and art, it also provides a stage where performing artists can show off their creative works. The

Volunteers of the 2014 IOI takes a head start on learning to be a guide at the National Center for Traditional Art.

emphasis here is on the continuous propagation, innovation, and renewal of traditional arts. You can stroll casually among artistic creations, listen to elegant music, and enjoy exciting opera performances--and you can even participate in the process of artistic creation yourself. From the Center, you can take a boat and visit the Dong Mountain.

The restaurants in the center serve a variety of Yilan traditional foods and snacks. Yilan foods are so delicious that one should try as many as one can. Moreover, there are many handicraft stores that are popular with tourists. One can buy some interesting crafts as souvenirs. Also, there are sometimes exhibitions and performances in the center for one to enjoy.

Game

Once upon a time, an old lady went to sell her vast quantity of eggs at the local market.

When asked how many she had, she replied:

Son, I can't count past 100 but I know that.

If you divide the number of eggs by 2 there will be one egg left.

If you divide the number of eggs by 3 there will be one egg left.

If you divide the number of eggs by 4 there will be one egg left.

If you divide the number of eggs by 5 there will be one egg left.

If you divide the number of eggs by 6 there will be one egg left.

If you divide the number of eggs by 7 there will be one egg left.

If you divide the number of eggs by 8 there will be one egg left.

If you divide the number of eggs by 9 there will be one egg left.

If you divide the number of eggs by 10 there will be one egg left.

Finally, if you divide the number of eggs by 11 there will be NO EGGS left!

At least how many eggs did the old lady have?

Answer of 7/15:

3	1	5	2	6	4
4	6	3	5	1	2
5	4	6	1	2	3
1	5	2	4	3	6
2	3	1	6	4	5
6	2	4	3	5	1

Chunghwa Telecom is the leading and largest integrated telecom service provider in Taiwan, with professional, creative, integrity, and green sustainable as core values, has dedicated to developing digital convergence environment. Our goal is to be a value-creating and trustworthy company in providing information and communication services. We provide domestic fixed communications services, mobile communications services, internet services, international fixed communications services and other ICT services.

For IOI 2014, CHT provides high speed fiber optics broadband and wireless network, which enable coaches and students to communicate each other with these excellent quality networks. As to increase scoring efficiency and displaying result in time, CHT also provides the highest level cloud services, include bandwidth, auto scaling capability and load balance service.
